

WIGGINS **MARINA BULL**²

Introducing the revolutionary lift that pays for itself!

Quality, Durability, Reliability. **Wiggins.**

WIGGINS
LIFT CO., INC.

WIGGINS **MARINA BULL**²

PATENTS PENDING

THE REVOLUTION IS HERE.

This boat lifting and stacking system operates similar to a conventional Wiggins Marina Bull™ in many ways, but can lift and stack longer boats in buildings with narrower aisles, as well as racking full length boats in the end racks. This allows the Marina Owner to maximize income for a given facility footprint.

This new and innovative boat lifting and stacking system can stack longer boats in buildings with narrower aisles, as well as racking full length boats in the end racks. This allows the Marina Owner to dramatically increase revenues for a given piece of real estate. **A marina owner can now have more income on less property!**

The **Marina Bull²** retrieves boats in the traditional manner but after lifting a boat the Traverse Carriage brings it back over the frame shortening the overall length to only 10 feet longer than the boat itself*. In Drive Mode the operator console actually turns away from the load giving the operator a clear field of vision for increased safety. When racking the boat the operator console turns back to face the load and will actually elevate, dramatically increasing accuracy and safety during the racking procedure. In addition, the operator console moves forward with the load as the boat is placed in the rack.
